Good morning

I think recommendation 8 should be pursued - i'm assuming it's not part of the committees ToRs to do so as part of this inquiry?

Recommendation 5 is interesting, especially if all stores in a chain are required to have the same price. One of the things that grates me about the industry is the sheer arrogance of Woolies Majura dropping their prices to compete with Costco while the latter is open - I think that's a classic example that could be reflected in the committee report. Rec 5 would address that given it would require them to lock in prices for 24 hours.

Recommendation 3 looks to have some merit based on the research.

Ultimately I think the point about consumer behaviour is well made - I am guilty myself of not comparing any prices and going to my local service station (which is a bit out of the way) as a matter of course.

Thanks for your consideration of this topic.
