Dear Sir or Madam

I would like to bring to your notice on what happened when you cut out some action buses to save money, at the people's expense, how could you expect people to travel on buses like this they were packed in like cattle, It has also come to my notice that school children were left behind because the bus was full. The parents leave them knowing the bus is coming, but little do they know the bus is full and goes straight passed, the next call the parents could receive is from the police to say their child is ~~hilled~~ killed

come on lets get back to the real world and ~~run~~ service the people the way they should be, the drivers are doing their best, but they are the one's getting all the abuse from the customers

You will never make the buses pay in Canberra, as it is to spread out to ~~match~~

If you wish to save money cut some of fat off government expenses, I know this is possible as I have worked in local government myself

all I want to see is people treated like people and not objects

I would like to see the bus interchange moved to woolworths as soon as possible

It is terrible to see old people going from the mall to the interchange with

shopping

Yours Faithfully
Charlie Tompson
