

Desexing expenses receipts

The following document contains two parts:

1) Vet Invoices

Invoices for the desexing of cats in alphabetical order of the cats' name. The only exception to the alphabetical ordering is the invoices from Crookwell vet at the end of the list of invoices, as these were provided in one combined file.

Please note that the dates shown on the desexing invoices reflect the date each invoice was issued. Depending on the veterinary clinic and the frequency with which they issue invoices, the actual date of payment may fall several days later.

2) An extract from our accounting software (Xero), for the period 1 January – 30 June 2025, showing transactions relating to veterinary costs

The grant was used to support a portion of the desexing expenses incurred during the reporting period; the actual number of desexing procedures and the total veterinary expenses during this time were substantially higher.

As we use Xero for our accounting, the highlighted transactions in the extract identify and correspond to the invoiced desexing procedures that were supported by the grant.

A total of 62 cats were desexed using funding from the ACT Companion Animal grant.

Canberra Street Cat Alliance: Operation CatPacity

The list of animals desexed is shown below, including a selection of their photos.

Lucian (Higgins tabby #3)

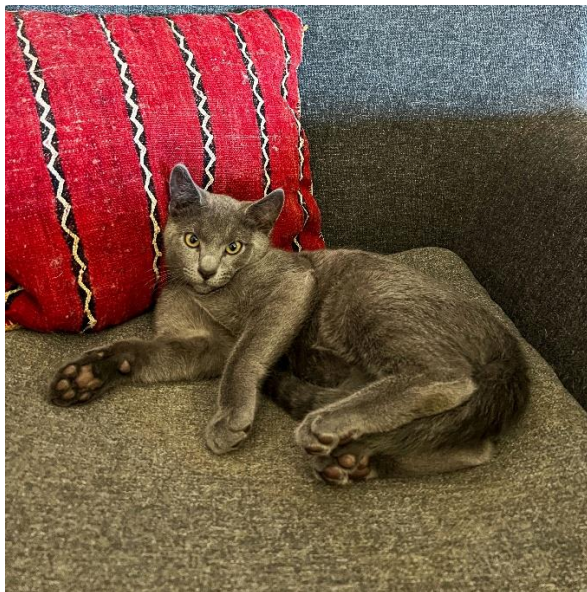

Echo

One example of the cats desexed through the program was Boeing.

He was named as such because when he came in with his four other grey siblings. He was easy to tell apart however because while they were all very timid, he stood out as having extreme 'airplane' ears. After some time in care with an experienced foster carers he flew off into his new home!

The kittens had been relatively easily trapped initially but their mother proved harder to capture. After several weeks she was also caught and desexed, effectively ending any future reproduction from her.
