**Subject:** Sound insulation and physical security for residential and business developments in commercial zones

Hi Mary,

I wish to voice my concerns about the current lack of regulation regarding sound insulation and physical security for residential and business developments in commercial zones. I am particularly concerned about the negative impact the noise coming from the Transit bar (Akuna St) has on the resident in the Waldorf Hotel (eg. deprivation of sleep, etc..)

The reason for me to write this mail to you is to ask you to alter/enhance the legislation so that It is clearly specified that it is the responsibility of the venue hosting "live or amplified music" to ensure that the venue is appropriately sound proofed completely.

Thanking you for your consideration

Much appreciated

Regards

Herve Meslin
