Chair
Planning and Environment Committee
Legislative Assembly of ACT

Dear Mr Gentleman MLA

As you will be aware there has been considerable community concern around the National Capital Authority's development proposals around the lake and members of the community have raised with me concerns about the impact of the development on transport. I am writing to encourage your committee to consider how the proposed development will impact on the provision of transport, particularly public transport for Canberra. I would encourage the Planning and Environment Committee to meet with the NCA and the Joint Parliamentary Committee to discuss these issues.

Regards
Trish Harrup
Director
Conservation Council SE Region and Canberra
