Subject: Input into Ministerial – Lake Ginninderra – Fitzharris/Gentleman

Response:

The ACT Government is working in a number of areas to reduce pollutants entering waterways via the stormwater system. This includes the Territory's ongoing stormwater operation and maintenance program, effective water sensitive urban design and community education. Further, Environment Protection Officers routinely monitor water quality in our urban lakes.

The stormwater operation and maintenance program includes street sweeping, gross pollutant trapping and removal, and rubbish removal from and around our lakes, ponds and waterways. This program plays an important part in managing water quality.
