Independent review of ACT Government action on climate change

The consultants Rooftop Social and the Institute for Sustainable Futures (ISF) at the University of Technology Sydney have provided EPSDD the final report and presented their key findings, insights and recommendations from the review to Steering Committee and Technical Working group members from across ACT Government on 7 February. The review found that the ACT has strong foundations to deliver net zero emissions and strengthen climate resilience but identified some areas for further work. The key themes across their recommendations are:

- to create an updated version of the Climate Change Strategy with some key focus aspects; and
- To facilitate further coordination and partnerships to allow the sharing of expertise and involvement from the broader ACT community to achieve our goals.

The report will be provided to your office. EPSDD is considering the recommendations and working on developing the government response to the Review. The briefing packages with the government response to the Review findings will be provided to you by mid-2025.
