City Services

Dot Point Request

Requested by: Minister's Office

Business Unit: Territory and Business Services

Subject: RPSCA Project Home

Dot Points: The question then is whether the RSPCA could be given support in dealing with the lack of space on their current premises, although I am not sure if this has been looked into and what the option would be, I do know they struggle providing the services in animal protection and care that people expect from them. I would hope the ACT government would be discussing that with them.

- Domestic Animal Services (DAS) interacts on an operational level with RSPCA on a regular basis in relation to inspectorate services and kennelling of animals.
- RSPCA will seek support from DAS to manage demand and risk associated inspectorate services on an adhoc basis.
- Managing, maintaining and increasing appropriate levels of resources and capacity is a known challenge.
- The nature of the relationship between RSPCA and TCCS ensures that where possible, any assistance in relation to capacity can be assessed efficiently and if required assistance rendered as appropriate.
