In relation to:

MR PETERSSON: Could you then take on notice, just how many field staff you had working over each day of the week—

Mr Billing: Sure.

MR PETERSSON: —following the storm? Thank you.

[EVOENERGY]: The answer to the Member's question is as follows:—

Evoenergy deployed all available staff from across the business to work in its storm response including staff who returned from annual leave early and many staff who worked outside of their normal roles.

Evoenergy rotated staff in shifts to manage their fatigue with efforts continuing around the clock including a night crew, until customers were fully restored.

Evoenergy further bolstered its response with a surge workforce of 21 Endeavour Energy staff from NSW between Wednesday 5 January and Sunday 9 January 2022.

The below table shows the count of Evoenergy Electrical Workers, working each day of the storm response. Note this table does not include Network Controllers, office staff or Endeavour Energy staff working in the response.
