

Standing Committee on Planning, Transport and City Services

Inquiry into Annual and Financial Reports 2022-2023 **ANSWER TO QUESTION ON NOTICE**

Asked by Mrs Elizabeth Kikkert MLA

Reference: Hearing on 20 November 2023, Annual Report of Transport Canberra and City Services 2022-2023, page 296, Output 2.1

In relation to: Community Paths

1. In the previous two annual reports, data for the increase in length of community paths and cycle lanes were reported separately. The latest annual report has those data combined. Why was it decided to combine them?
2. Of the 34kms worth of community path and cycle lanes, how many of those kilometres were community paths and how many were cycle lanes?
3. Of the 34kms, what percentage of these paths and cycle lanes were gifted by developers and how many were built by TCCS?
4. Where were these paths and cycle lanes built and what was the length of each one?
5. If these paths and cycle lanes had associated levels of priority, what priority were they at the time they were built?

Minister Chris Steel: The answer to the Member's question is as follows: –

1. In the 2022-23 Budget, the Directorate amended its accountability indicators in relation to the increase in paths. A new indicator "Increase in length (km) of community paths including cycle lanes" was established with a target of 60 kms. This indicator replaced the previous two indicators including: (1) "Increase in length (km) of community paths" (which had a target of 35kms) and (2) "Increase in length (km) of cycle lanes" which had a target of 25kms. The change was made due to the duplication of cycle path kilometres which were previously counted in both old indicators. The combined new indicator maintains the same kilometre target without the duplication.
2. 29.6km of these were community paths and 4.6km of these were cycle lanes.
3. 74% of these paths and cycle lanes were gifted to TCCS by land developers and 26% of these paths were constructed by TCCS.

4. The table below details the paths and cycle lanes.

Location	Project Title	Path Type	Total Length (km)	Handover Type

5. TCCS maintains a master list of strategic network improvements. This list consists of individual projects that have been strategically merit tested and ranked in addition to other programs such as paths associated with school safety, accessibility, renewal/replacement, and missing links.

The highest priority projects identified to progress to feasibility and preliminary design are intended to ensure a continued pipeline of strategic network improvements across the ACT, with detailed design and construction funding to be sought if appropriate in future Budget processes.

There is no associated level of priority for the gifted assets. These assets are built by land developers. However, TCCS advises developers where to add additional infrastructure beyond the estate development to assist with the active travel network overall or improve flow of traffic adjacent to the development.

Approved for circulation to the Standing Committee on Planning, Transport and City Services
