Subject: Draft Variation to the Territory Plan No. 302—Community Facility Zone

I wish to support the Deakin Resident's Association submission in regard to DV 302.

In general I strongly object to areas granted as concessional leases being subject to a change of lease which benefits a group other than the general community. This goes entirely against the original purpose of these concessional leases. Such change of lease often involves a project which reduces open space and once lost this can never be regained
