Subject: Inquiry into elements impacting on the future of the ACT Clubs sector

Dear Committee,

I submit that, because poker machines require no skill and are guaranteed to lose their users most of their money, they should be regarded purely as entertainment machines. The net income from each machine should only cover the cost of providing and maintaining the machine, plus a small profit.

In order to achieve this and avoid overuse by "problem gamblers" the maximum cost per spin should be limited to one dollar.

Sincerely,

Chris Emery
