Hi Ben

Following our chat today, I registered my concern about the dust/mist cloud settling on your house with Worksafe and EPA phone lines, and I also put in an online report – see text below.

You might see some value in putting in your own statement? If so the feedback form can be hard to find so here's a link:

<https://www.accesscanberra.act.gov.au/app/ask/c/142,145>

***For urgent Attn - Fluffy house dust/mist cloud lands on neighbour's property***

*I have just witnessed the dust/mist cloud from the demolition of 4 Barrow Place, Lyons (a Fluffy property) land on the adjoining property (24 Olympus Way, Lyons - showing on map below as 2 Barrow Place). This has happened repeatedly over several hours from 8.00am this morning, and is continuing as I write now (1.00pm 25 May). I have taken photos which I am happy to make available.*

*This raises environmental safety concerns given the possibility that the dust/mist cloud is contaminated: I understand that in Sept 2015 two Worksafe inspectors were enveloped in a similar demolition cloud, and their clothing was then found to be contaminated (<http://www.canberratimes.com.au/act-news/worksafe-inspector-exposed-to-asbestos-after-botched-demolition-of-mr-fluffy-home-20150923-gjswva.html>)*

*If the cloud is contaminated, then the contamination will rest outside the perimeter of the Fluffy property, and beyond the reach of the air monitoring devices stationed at the perimeter. In that case, it is possible that Worksafe will not consider the matter within their remit.*

*As this situation is possibly being repeated all across Canberra, I believe it warrants checking out urgently as an environmental safety concern (irrespective of whether current Worksafe procedures for Fluffy houses are being satisfied).*

*I therefore bring this matter to the attention of both Worksafe, and the EPA for your urgent attention (I have also reported this matter to via the contact numbers for both Worksafe and EPA).*

fyi

Meg McFarlane

PS: Your place shows up as 2 Barrow Place on the map provided on the Feedback site – that might be why people have been asking for 2 Barrow Place (much earlier today).
