**THE CHAIR:** Amazing, thank you. And just going back to the lithium battery have the risk assessments been conducted to evaluate the potential heat related hazards associated with the lithium batteries in the fire truck?

**Mr Gentleman:** Yes, Rosenbauer do that.

**THE CHAIR:** And you have those documents for the risk assessment?

**Mr Gentleman:** We will be able to find that. The government would find them for you, yes.

**THE CHAIR:** Thank you, and pass that on to the committee. That would be great.

Mick Gentleman MLA: The answer to the Member's question is as follows:–

Rosenbauer has undertaken extensive testing on all aspects of its Concept Fire Truck, resulting in the release of their Revolutionary Technology (RT) series firefighting vehicles. This includes testing and risk assessments on the lithium-ion batteries used in their RT range. The information from this testing is the intellectual property of Rosenbauer and cannot be shared for commercial reasons.
