Strategic Advisory Group for the next Climate Change Strategy

The first meeting was held on 9 May 2025 with participation from across ACT Government. The group was presented with background on what’s been heard to date; what work is underway and the gaps that support the need for a new Climate Change Strategy. Discussion was held on the proposed structure and content of the overarching framework for the Strategy, as well as draft principles and focus areas. Key discussion points included support for:

- a. complementing and not duplicating existing work;
- b. ensuring there are links to the broad range of work underway; having a focus on adaptation; and
- c. how the strategy links with work outside the ACT Government, such as Commonwealth adaptation and emissions work.
