

I am writing to the committee to support plan 307. I have been a resident of the inner south for 15 years and a citizen of Canberra since 1969. I am a proud Canberran and true to my belief after the NCDC, as such will only support growth were it is appropriate and supportive of the environment and community.

To declare my interests, a financial supporter of the Brumbies.

We live in a branch office in Canberra, although Canberra is the seat of our Federal Government it is a community often derided as a city without a heart.

Our sporting teams have changed a lot of perceptions and have bound the community as one could describe "a home as opposed to a house"

The financial benefit to the Brumbies and the community achieved by you "the committee" to choose logic far out ways the naysayers who never want to change. It was an election promise by The Honorable Malcolm Fraser that Canberra would have a F 1 circuit and host the Australian Grand Prix.

Hey guys we really need reasons for interstate and overseas visitors to choose Canberra.

There are financials and sense that bring to offer my support for this plan with benefits to both sides.

Brian Evans
