**Enquiry Into The Proposed Appropriation(Loose -Fill Asbestos Insulation Eradication)
Bill 2014-15
Submission By**

Mr Fluffy Home Owners

After having received and reading report of the Asbestos site assessment of our house we are of the opinion that there is no signs of loose Asbestos visible or present especially in the living area.

This being the case we cannot understand why our house should even be considered as a knock down rebuild property. Given that both my wife and myself are now in our 80's we would find it very difficult to even consider looking for alternative accommodation.

To us our life is revolved around our house and the thought of having to loose it would be a catastrophy apart from affecting our health and our normal day-to-day way of living.

We have worked all our life to provide ourselves with a comfortable and happy retirement and be close to our family.

Also my wife and myself in the past 3-5 years have had to deal with many health problems for which we are still having to take medication to keep them under control. 12 months ago I had major surgery on my heart (double by pass operation) which went terribly wrong which meant a return to the operation theatre directly finishing up with a 10-hour operation.

My health has never been the same since and a move of this capacity could have very severe consequences.

After having lived in this house for the past 22 years we both feel we have not suffered any ill effects through the asbestos problems supposedly that you say could be present.

Yours respectfully

25 November 2014
