

To whom this may concern,

I am writing in support of the Brumbies proposal to seek a variation to the Territory Plan No.307 – Griffith, Section 42, Block 15 to allow for residential development. I work in Griffith and am happy to have so much green around, like in a lot of Canberra. I do however not see any major hindrance in allowing for some development, particularly with the expected benefits the aforementioned project would bring:

- additional, well located, in the neighborhood integrated accommodation
- expansion of the Brumbies - a Canberra asset - facilities to match their international status
- general development of a city that has much to offer.

I am looking forward to the opportunities this development will provide and remain convinced that despite the temporary nuisance building works will cause to the neighborhood, once the project complete, Griffith residents will embrace the change and enjoy the improvements to their suburb that will ensue.

Best Regards,

Jenny Yang
