Dear Nicola,

Thank you for the opportunity to provide further comments on DV 288.

Communications and consultations relating to the recommended variation were generally presented in the context of the Lyons site and I would therefore suggest that many people did not and do not realise that there may be broader implications of this variation. This may have impacted on the numbers and focus of submissions received.

I respectfully submit that the Committee consider undertaking further public consultation on the territory-wide implications that this proposal may have, making it clear that this is not just a site specific proposal.

Regards

Chris Erett
