

To the Planning and Environment Committee
ACT Legislative Assembly
Canberra ACT 2600

I sent to the government two submissions for saving Australian Heritage Village by post, one was from my father previously.

- This place has great memories for my family as we had picnics and free music there and had a New Years Eve there.
- It was a free meeting place and being on a low income it was an outing for us and other families.
- I would hate to see it gone and lose those beautiful buildings.
- It should be restored please make it happen.
- Please let us have some open space to walk.
- This day unless you have cash, there is nowhere to go especially on the Northside and there are plenty of people on low incomes.
- It's always the people on high incomes making the rules. Walter Burley Griffin planned Canberra and look at the mistakes since.
- Enough is enough. It comes down to using common sense and not follow the leader regardless.

Thank you

Deborah Fulton
