**Categories:** Territory Plan

Dear Committee, I would like to appear before the committee to raise specific statutory and administrative issues regarding the Territory Plan functionality and particular documents that appear to lack policy connectivity, and in addition, procedural issues with the engagement and consultation processes.

As a planner with 30 years of international experience, a current Fellow and past ACT President and Director of the Planning Institute Australia, and a former lecturer in statutory and strategic planning at the University of Canberra with extensive knowledge of plan-making systems, along with being a former Territory Plan Manager, I believe my insights may assist the committee with its interests.

I note that I currently and have also worked in senior planning roles in NSW and that my personal experience of the current and former DA systems may also be of interest.

My details are :

Hamish Sinclair, FPIA, MNZPI
