Requesting Directorate: EPSDD

Responding TCCS Division: Territory and Business Services

Subject: RSPCA facility in Weston

Objective reference number: MIN S2021/00467

Please address the following issue:

I have received representations from a constituent, regarding the RSPCA facility in Weston.

My constituent has enquired as to whether there are any current plans to relocate the RSPCA Weston facility to another location.

Minister, could you please provide the relevant information to address my constituent's query. If this matter does not fall under the Minister's portfolio, please forward it to the relevant Minister for action.

TCCS Response:

- RSPCA ACT has occupied their current site at Weston since the 1960's. The current facility consistently operates over capacity.
- The ACT Government has agreed to provide land and construction funding to assist the RSPCA in building a fit for purpose facility within this term of government.
- Feasibility studies and detailed designs will be undertaken to determine the suitability of any alternative site as necessary.
- These designs will also inform the nature and footprint of the facility, ensuring that it is not only fit for purpose for current RSPCA operational requirements, but that it also exhibits sufficient flexibility to accommodate future needs.
