

CLASSROOM ACTIVITY

Memory: Westminster system

Test your memory with this simple game that has you race to match the most pairs of features of the Westminster system with their definitions.

1. Print out and glue this page to some coloured card, then cut out the 16 squares.
2. Shuffle the squares and place them face down in a 4x4 grid.
3. Organise yourselves into two teams. **Team 1** turns over two squares. If they match, they keep the pair and go again. If it is not a match, they turn the cards back face down.
4. **Team 2** now turns over two squares. They follow the same rules as step 3.
5. Each team alternates until all matches have been accurately made. The team with the most accurate pairs wins!
