Notices

- *1 **MS ORR:** To move—That this Assembly:
- (1) notes that:
 - (a) bees and other pollinators are fundamental to our environment, with an essential role in pollinating plants, helping them grow and reproduce;
 - (b) bees and other pollinators are crucial to our food chain as they help pollinate most of the crops we eat, as well as the crops that feed farm livestock;
 - (c) without bees and other pollinators pollinating our crops, whole industries would collapse, and severe food shortages would impact all Australians;
 - (d) destruction of their natural habitat, intensive farming practices, climate change, and pests and diseases are just some of the complex reasons driving a decline in both the number and diversity of bees and other pollinators every year;

- (e) the decline of bee and other pollinators populations is an issue that is present all around the world, not just within Australia;
 - (f) the varroa mite is currently threatening a large number of beehives around the NSW region with many beekeepers having to destroy their colonies; and
 - (g) Australia has around 2,000 species of native bees, with the introduced European honeybee species having a negative impact on our own native bee population but providing essential pollination for crops and other plant species;
- (2) further notes:
- (a) in 2018-19, honey and beeswax production was valued at \$162 million in Australia, and the unrecognised value of pollination is believed to be in the order of \$14.2 billion to the Australian economy; and
 - (b) Hall Village in Yerrabi, is the first Bee Friendly Village in Australia, with over 90 percent of household's gardens being registered as bee friendly, according to Hall Village's February 2020 report;
- (3) calls on the ACT Government to outline:
- (a) the variety and types of bees and other pollinators in Canberra;
 - (b) current populations and locations of native hives, feral European beehives and beekeepers and their hives;
 - (c) what the ACT Government currently does to support our bee and other pollinator population including but not limited to:
 - (i) easily available pollinator friendly planting guides;
 - (ii) targeted efforts to promote pollinator planting in different urban forms eg, low, medium and high density;
 - (iii) plantings on public land that support bees and other pollinators;
 - (iv) spatial mapping of pollinator resources including pollinator gardens; and
 - (v) any other relevant information;
 - (d) the response to currently identified threats to the ACT's bee and other pollinators population including but not limited to:
 - (i) insufficient diversity in public and private planting stock;
 - (ii) the potential for commercially available bee hotels to be unsuitable for native bees;
 - (iii) the identification and implementation of potential methods of pest control which are alternatives to pesticides but are currently not used in the ACT;
 - (iv) the methods for safely and properly disposing of domestic herbicides and pesticides; and

- (v) any other relevant information;
 - (e) current biosecurity threats and the Government's response to an endemic threat;
 - (f) how Canberrans are educated on the importance and role of bees and other pollinators within our environment; and
 - (g) ongoing activities and potential opportunities where the ACT Government and Canberra community can collaborate to better protect our bees and other pollinators; and
- (4) calls on the ACT Government to report back to the Assembly on points (3)(a) to (3)(g) by World Bee Day on Saturday 20 May 2023. *(Notice given 17 November 2022. Notice will be removed from the Notice Paper unless called on within 4 sitting weeks – standing order 125A).*

 - (f) that the Uluru Statement from the Heart, addressed to the Australian people, invited the nation to create a better future via the proposal of key reforms, asking for constitutional change and structural reform in their relationship with Australia;

 - (d) according to work undertaken by the University of Canberra, sediment in Lake Tuggeranong released 111 kilograms and 113 kilograms of phosphorus in the 2017-18 and 2018-19 seasons respectively;

- (e) modelling from the University of Canberra suggests that approximately 80-100 kilograms of phosphorus is sufficient to maintain current algal bloom outbreak conditions in Lake Tuggeranong;
 - (f) the *State of the Lakes and Waterways in the ACT* report, prepared by the Commissioner for Sustainability and the Environment in May 2022, identified a range of impacts on the lake's water quality, including nutrients, sediment, animal faeces, litter, urban development and organic waste from across the catchment area;
 - (g) the importance of ensuring that the grass clippings from household and government mowing do not enter the storm water system and the lake, preventing any possible contribution to water quality problems; and

 - (iv) extension of the University of Canberra's research in the Lake Tuggeranong Catchment; and

- (v) support for the development of new modelling and reporting tools;
- (e) in November 2021, the ACT Legislative Assembly resolved to continually update and modify standard operating procedures to minimise grass clippings from entering stormwater drains and waterways; and
- (f) the ACT Government is currently developing an Urban Open Space Management Plan which will explore opportunities for better mowing practices, care of urban open space and implementing rewilding initiatives; and
- (3) calls on the ACT Government to:
 - (a) consider and explore options to improve the collection of grass clippings from its mowing program to protect ACT waterways. These options could include:
 - (i) trialling a dedicated street sweeping program in line with the most intensive mowing and leaf litter seasons;
 - (ii) training for ACT Government mowing technicians; and
 - (iii) trialling a post-mowing program to collect grass clippings and other organic matter for proper composting;
 - (b) consult on the Urban Open Space Management Plan through YourSay, and publish the plan upon completion; and
