Dear Max,

I really appreciate the time offered by you and the chief minister in allowing me to discuss about my innovation that could help resolve issues with water quality monitoring in Canberra and potentially Australia as a whole. As I mentioned, it would be great if I could be provided with some assistance in getting in touch with someone in the water quality management authorities in the ACT to discuss about their current detection methods so that I may gauge whether my new technique might be of interest to them.

Your assistance in this matter would be of great help in finding a potential solution to the current problem of algal blooms in our lakes.

Thank you,

Yours sincerely,
