Answer Due: 6 August 2026

Mr Kerr took on notice the following question(s):

**MS CARRICK:** So are you able to just take that on notice whether the Flat Rock proposal at Uriarra will have any—what impact it will have on the ACT.

**THE CHAIR:** Sorry, just confirming, is that Evoenergy's project?

**MS CARRICK:** No. It is a private project, but it impacts the NEM which are we not all working on the NEM?

**Mr Kerr:** We can take that on notice.

**The answer to the Member's question is as follows:**

Based on publicly available information, the Flat Rock Battery Energy Storage System (BESS) at Uriarra is a private project that proposes to connect to the Transgrid transmission network. As the project is proposed to connect upstream of the Evoenergy network, it does not impact the Evoenergy network.

Evoenergy is not aware of any applications or enquiries from the Flat Rock project to connect to the Evoenergy network and is not aware of any impacts the project would have on the Evoenergy network.
