Good evening,

I would really like to buy an electric vehicle, but I can't afford one yet. If there were more subsidies or the price dropped (perhaps from increased availability) I would definitely purchase one. I have rooftop solar and it just makes sense to switch to EV.

One thing I wonder is that if I got a loan for an EV, how much I would save on petrol, and how much it would it cost to repay the loan each year - and therefore how much out of pocket would I be if I switched? Some advice or an online calculator would help me with that.

Thanks,  
Sarah Adams
