MR PETERSSON: You just mentioned when the vehicle becomes operational for firefighting purposes. Do you have a schedule for when that might occur?

Mr Phillips: That occurs once we answer the other question in regards to the registration, and the working group to sign it off those people have been trained and are ready to go. The date—I will have to take that on notice.

Mick Gentleman MLA: The answer to the Member's question is as follows:—

The Hybrid Electric Fire Truck will become operational following a mandatory commissioning process which will include the training in its use. This is expected to occur in in late 2023 or early 2024.
