Submission to the Inquiry into Billboards by the Standing Committee on Planning and Urban Renewal.
 Submission by:
 Chris Winter

As an ACT resident I am STRONGLY opposed to any form of billboard advertising in the ACT, this includes, but is not limited to, fixed and mobile billboards.

Having moved to Canberra only a few years ago, one of the major draw cards was the "bush feel", as you look around the city you can see historic and significant buildings which are integrated with, and complement, the natural beauty of the Canberra region. Allowing billboards in any form would destroy this charm.

I feel billboards are ugly, distracting, and serve no purpose. With the prevalence of online advertising people are bombarded enough without the need to ruin the look and feel of our city. I understand there is a need for local businesses to advertise their businesses but I feel this should be keep to a minimum size and keep to their local precinct.

Kind regards

Chris Winter
